TTS1U MATS Rooftop Worker – Safety & Access

For access and work on flat rooftops, particularly in the telecoms industry. Mandatory requirement to work on BT and Arqiva sites. Course includes managing common hazards, using harnesses, fall arrest lanyards and fixed fall arrest and restraint systems. Conforms to MATS requirements and includes registration to the EUSR Quartz portal. (1 day)

TSK4U RF Hazards – Awareness & Monitoring

For anyone working in the vicinity of transmitting equipment on rooves, masts or towers. Detailed knowledge on the effects of RF on the human body and means of identifying danger areas. (0.5 day)

TTS7U Industrial Climbing & Rigging

Practical course for companies and individuals required to climb and rig antenna systems. Covers several modules including foundation for work at height, roof safety, RF hazards, rescue techniques and rigging and light lifting. (5 days)

TTS2U MATS Initial Basic Tower Climbing & Rescue

MATS course for persons who are starting out in the Telecoms industry and are required to access all parts of a typical structure and perform the required foreseeable rescues. Provides a range of skills for climbing, including the use of all safety equipment and tower rescue. (3 days)

TTS2UR MATS Initial Basic Tower Climbing & Rescue - Revalidation

Refresher training for persons required to climb on masts or towers or for existing climbers who wish to renew their tower climbing and rescue certification. Emergency procedures are followed by evacuation and rescue and are practised at height. (1 day)
