

RescuePack ROTOR MaxLift TC 50m, ProSeal 10Y

WK38050S

Comprehensive system for powered rescue , evacuation and escape from Tower Cranes

The Rotor MaxLift is optimised for rescues where lifting capability is critical. Configured specifically for Tower Crane rescue, escape and evacuation and complies with the CPA Good Practice Guide, TCIG 2101.

At the core of the system is the Rotor MaxLift constant rate descender (CRD), an intuitive 2 person rescue, escape and self-evacuation device. Suitable for any orientation, no external moving parts (reducing entanglement risks) and is fully bi-directional.

For more complex rescues, the Rotor MaxLift can lift a casualty with ease, using either the ratchet handle supplied or the MaxLift PowerPack, supplied separately. With the integral locking mechanism engaged, progress capture is fully automatic and the load is held if the driving mechanism is released.

Nominal Rated load 140kg, Maximum lift load as part of conformity 300kg. The maximum descent height, 4500m -140kg, 500m - 200kg, 220m- 250kg.

The locking extendable rescue pole is non-conductive rigid when fully extended and extends up to 3.5m allowing immediate connection to the suspended persons harness, utilising a unique quick release bracket

The complete system is supplied in a robust, sealed protective Kari bag within an interior hermetically sealed vacuum foil bag, giving the whole system a 10 year life span with simple easy to use inspection process. All contents are protected with a padded lining with inspection / reseal pack included and Includes the ultra compact, universal sized, casualty harness and a pulley and slings to enable deviations to be created.

The ProSeal typically extends the useful life of the contained products, with fewer materials and resources needed over its lifetime.

Kit includes:

- Rotor MaxLift CRD x 1
- 9.5mm CRD Rope x 50m (100m also available)
- Delta casualty harness x 1
- Rescue reach pole x 1
- Rescue pulley x1
- Throwline, 50m x 1
- Sling, nylon protected 120cm x 2
- Oval karabiner x 3
- Oval captive karabiner x 1
- Pear screwlink x 1
- Rescue kit bag x 1

Patented GB2515341
