

CORONA integral chest harness with Sync

H52I

Chest harness with integral Sync compatible with Eclipse and Extol harnesses for rope access

Features:

- Integrated Sync ascender
- Connection design orientates ascender close to the chest
- Front and rear attachment points
- Shoulder padding
- Elastic web retainers
- Simple to fit and adjust with no tools required

Corona Integral is design to be used with the Eclipse quick connect sit harness (H02Q) to create a modular full body harness with integrated chest ascender.

When attached to the Eclipse sit harness the front and rear attachment points can be used for fall arrest.

Can be used to upgrade or replace a standard Corona (H52) chest harness or Extol (H22Q) full body harness when an integrated Sync is required.

Shoulder padding increases user comfort.

Elasticated web retainers stow excess webbing neatly away.

Chest harness can be connected quickly and easily to the Eclipse sit harness.

Specifications:

NB: specifications and colour may change without notice.

Size:	Standard	Attachment Points:
EN Test Mass:	140kg (when attached to ECLIPSE quick connect)	Sternal
Loading:		Dorsal
Conformity:	EN361:2002 (when attached to ECLIPSE quick connect)	Harness Measurements
Materials:	Polyamide, steel, aluminium	Torso
Weight (kg):	0.70	Waist
Industries:		Thigh
