

Screwlink pear 10mm

CSP10

Pear shaped connector used to attach rope device in a variety of rescue systems.

High strength.

Large opening of 22mm

Much more secure than a karabiner. Negates the possibility of cross loading.

The pear screwlink allows several connections to be made simultaneously.

It is most useful for rigging pulley systems where twin pulleys are not available and single pulleys must be attached side by side.

Screw barrel must be fully closed during use.

Specifications:

NB: specifications and colour may change without notice.

Size: 10mm bar. 20mm opening. Overall size 115x65mm

EN Test Mass:

Loading: 30kN major axis, 10kN minor axis MBL

Conformity: EN362, EN12275

Materials: Zinc plated steel

Weight (kg): 0.18

Industries: Fire and rescue service, rope access, rigging industry.

All our PPE, rescue and lifting equipment have both UKCA and CE conformity where applicable
