

Screwlink semicircular 10mm

CSS10

Semi-circular shaped connector used as main harness connector

High strength, totally secure for use as main harness connector - as used on the Phoenix harness.

Able to take multi directional forces.

Much more secure than a karabiner. Negates the possibility of cross loading.

Suitable for a wide range of uses in work at height and rescue situations.

Screw barrel must be fully closed during use.

Specifications:

NB: specifications and colour may change without notice.

Size: 10mm bar. 11mm opening. Overall size 85x65mm.

EN Test Mass:

Loading: 45kN major axis, 10kN minor axis
